

A year of steady growth, capped by a holiday surge.

FY2025 closed at \$4.59M in revenue across six regions and three channels. Electronics led every category, wholesale orders punched far above their weight, and the fourth quarter alone carried a third of the year.

02 Category Revenue by Quarter

Electronics and Apparel drive nearly all of the Q4 jump.

03 Insights for Decision-Making

SEASONALITY

Q4 delivered 33% of annual revenue — Oct–Dec generated \$1.53M of the \$4.59M total, powered almost entirely by Electronics and Apparel gift-buying.

CATEGORY

Electronics jumped 64% quarter-over-quarter in Q4 (from \$330K to \$540K), the single biggest swing of any category all year.

CHANNEL MIX

Wholesale punches above its weight: just 5% of orders, but a \$850 average order value pulls in 24% of total revenue.

OPPORTUNITY

Summer (Jun–Aug) is the flattest stretch of the year — the natural window for a mid-year promotion before the Q4 surge.
